EDUCATION

University of Southern California

Computer Engineering and Computer Science, B.S.

Expected Graduation: May 2029

Relevant Coursework: Data Structures*, Distributed Systems*, Embedded Systems, Calculus (II, III), Linear Algebra, Differential Equations, Discrete Mathematics

* Currently enrolled

WORK EXPERIENCE

UC Dessert Shift Lead / Assistant Manager

Oakland, CA

Nov 2022 – Aug 2025

- Supervised and coordinated shift schedules for all team members, ensuring optimal staffing coverage throughout the week.
- Led and supported team performance during high-volume hours, successfully managing over **60+ customer orders per shift** within demanding **6 hour night shifts**.

Mission Bit Web Development Intern

Oakland, CA

Jun – Aug 2024

- Developed and implemented a web platform using VS Code to educate high school students on potential career paths, impacting **15+** students.
- Engineered a responsive, pixel-perfect web application features tailored for cross-device compatibility and optimal user experience.

PROJECTS

AlphaScope - Stock Pattern Analysis App C++

- Built a terminal application to access real-time stock market data, implementing **custom string processing** for raw JSON responses to **identify and resolve three critical data parsing errors**.
- Created an **LLM-powered analysis via Claude API** to generate structured stock overview with technical indicators, generating stock summary and price action analysis.

TeachByte HTML, CSS, JavaScript

- Designed and implemented a **responsive web platform** using **HTML, CSS, and JavaScript**, focusing on clean UI, interactivity, and accessibility for student users.
- Integrated **OpenAI API** to power a context-aware career guidance agent, reducing average user query resolution time compared to static FAQ.

“untitled shooter game” (Roblox) Lua

- Implemented a **modular shooting mechanic** with projectile simulation, hit detection, and server-side damage validation from scratch.
- Engineered a **client-server architecture using Roblox RemoteEvents** with server-side anti-cheat validation.
- Developed a **data management system** to **store and update player statistics across gameplay** sessions.

ADDITIONAL

Technical Skills: C/C++, Java, Python, HTML, CSS, JavaScript, Lua

Tools & Technologies: Github, LLM APIs, Replit

Honors: QuestBridge National College Match Finalist, Oakland City Council Honors Commendation
